

# Pleasant Prairie Solar Energy Center

The Pleasant Prairie Solar Energy Center is a proposed 240 megawatt (MW) solar power generation facility in Franklin County, Ohio targeted to begin operating in 2026. Solar technology delivers clean, reliable, and affordable power from one of the oldest known energy sources and today is helping to modernize America's energy grid.

## Invested in Your Community

Clean energy projects live at the intersection of community interest, environmental stewardship, and innovative business practices. Invenergy designs projects that provide direct benefits to their host communities through new economic growth opportunities and additional funding to local organizations and nonprofits that are vital to the community's health and safety.

## Project Timeline

## Project Highlights

More than **\$231 million** invested in local tax revenue, land costs, and lease payments, over the life of the project

**240 MW** is enough electricity to power more than **46,000 American homes**

Up to **300 jobs** supported during construction

Up to **3 full-time** operations and maintenance staff

Emissions reductions equivalent to **96 million trees planted**

Supports local education, emergency & veteran services and environmental stewardship

Commits to developing projects while minimizing impacts to sensitive ecological resources and ensuring responsible land use

Invenergy's Hardin Solar Energy Center, located in Hardin County, Ohio.

## A Proven Track Record in Sustainable Energy Development

Invenergy is a leading, privately-held developer and operator of sustainable energy solutions.

A U.S.-based company, Invenergy invests \$573 million annually in the home communities where its projects are located.

Invenergy has successfully developed more than 200 projects, including wind, solar, transmission infrastructure, green hydrogen, natural gas power generation and advanced energy storage projects.
